

NON-RESIDENTIAL DEVELOPMENT IMPACT FEE SCHEDULE APPLICATION

Date: _____

Owner: _____		Phone: () _____	
Mailing Address: _____		City: _____	State: _____ Zip Code: _____
Location and Use:			
Street Address: _____		City: _____	State: _____
Section: _____	Township: _____	Range: _____	Parcel Number: _____ Zone: _____
Subdivision: _____		Lot Number: _____	Block: _____
Total Square Footage of Building: _____		Land Use: _____	

Non-Residential Construction Impact Fee:

Facility	Calculation	Quantity	Sub - Total
Sheriff:	\$ 8.97 per 1000 sf.		
Emergency Services:	1.18 per 1000 sf.		
Circulation: (See Trip Generation Rates Schedule)	37.09 per trip		
Total			

Example: The Impact Fee for a 3000 sq. ft. Standard Office Building would be \$2255.85.

Sheriff 8.97 X 3 = 26.91

Emergency Services 1.18 X 3 = 3.54

Circulation 20 X 3 X 37.09 = 2225.40

Total Due= \$2255.85

Applicant Signature: _____

TRIP GENERATION RATES

LAND USE	ESTIMATED WEEKDAY VEHICLE TRIP GENERATION RATE
AIRPORT	
Commercial	60/acre, 100/flight, 70/1000 sq. ft.
General Aviation	6/acre, 2/flight, 6/ based aircraft
AUTOMOBILE

Fast Food (without drive through)	700/1000 sq. ft.
Delicatessen (7am-4pm)	150/1000 sq. ft., 11/seat

NOTES:

For uses not listed, the Planning Administrator shall make the decision regarding the appropriate traffic generation rate. This determination shall be based upon ITE standards or traffic reports submitted with the proposed non-residential use.

For all uses in which more than one form of calculations are listed (i.e. ADT/square feet, ADT/acre, ADT/student, etc.), only one method (not the sum) will be used. The Planning Administrator shall make the decision regarding which method to use for calculation. This determination shall be based up on ITE standards or traffic reports submitted with the proposed non-residential use.

*Specialty commercial - Examples would be a flower shop, a store with crafts/knick knacks, a ceramics shop etc.

**Education Facilities - For purposes of general impact fee calculation, the fee will be based on square footage. If a traffic study is prepared to look in further detail at traffic impacts, per student ratios are sometimes utilized. Examples of ADT per student are the following: 1.3/student for high school, 1.4/student for junior high, and 1.6/student for elementary. The Planning Administrator shall make decision on which calculation is appropriate based on ITE Standards or traffic reports submitted with the proposed use.

***Industrial /Business Park (with commercial) - This would be an industrial park that has a deli and/or reproduction that are commercial establishments within the park.

**** Standard Commercial Office -Most offices would fall in this category. Typically this type of office would have customers. Examples would be a Real Estate Office, HR Block (taxes).

*****Single tenant office would be a building with only one tenant, often a corporate headquarters. It would likely be a destination more for the employees, rather than bringing in a large amount of public customers.
