SECTION II: CRITERIA FOR RECOMMENDATIONS AND DECISIONS

In accordance with 8-5-2 (C) of the Teton County Zoning Ordinance the Scenic Corridor Overlay shall apply to those lands within 330' of both sides of the right-of-way for Idaho State Highways 31, 32, 33 and Ski Hill Road from Driggs city limits to the Wyoming stateline.

- Design Review: All development shall be subject to design review to ensure that the location, scale, and appearance of buildings, structures, and development of land shall preserve the rural character of the areas bordering Idaho State Highways and Ski Hill Road and to prevent the construction of buildings that project upward beyond the ridgeline of any hill located within one (1) mile of major roads when viewed from those major roads.
- Documentation Required: The applicant shall submit plans and drawings showing all existing structures, building envelopes for all proposed structures, setbacks from the closest State Highway or Ski Hill Road, as applicable, existing and proposed landscaping and fences, existing and proposed off-street parking areas, and drawings of exterior elevations of primary structures visible from the closest State Highway or Ski Hill Road. These materials will be submitted with a conditional use or building permit application, and at the preliminary plat stage of a subdivision or PUD application.
- Design Review Criteria: A development application shall only be approved if the Commission finds that it meets the following criteria:

Setbacks: No permanent structure shall be constructed within fifty (50) feet of the outer edge of the road right-of-way, unless the parcel does not contain any buildable site outside of the setback area in, which case primary structures shall be located as far from the outer edge of the road right-of-way as possible.

Building Envelopes: The development shall identify building envelopes for all primary and accessory structures. Building envelopes shall comply with the following requirements:

- 1) Building envelopes shall be located so that existing topography and natural vegetation, such as ridges, hills, and existing trees, will screen buildings from view from the State Highways and Ski Hill Road to the maximum extent feasible.
- 2) Where existing topography and natural vegetation cannot be used to screen buildings as described in Subsection 1 above, building envelopes should be located at the rear or side edges of an open meadow or pasture, or at the foot of a hill or ridge, rather than in the middle of a meadow, pasture, or hillside.

Notwithstanding Subsections 1 and 2 above, building envelopes shall be located so that no portion of a building up to thirty (30) feet tall shall be visible over the ridge of the hillside on which it is located when viewed from the State Highways and Ski Hill Road, and the applicant shall submit a sight line analysis in sufficient detail to confirm that this standard has been met.

Building Materials: All non-agricultural buildings shall not be of highly reflective materials according to ASTM C6007, Light Reflectivity Index.

Roads and Driveways: Roads and driveways shall be designed to eliminate the need to back out onto the State Highways or Ski Hill Road. Existing roads and driveways shall be used where practical.

When it is not practical to use existing roads, then new roads and driveways shall be located to skirt the edge of meadows and pastures (i.e. avoid dividing them) to the maximum extent feasible.

Satellite Dishes: All satellite dishes in the proposed development shall be located to minimize visibility from the State Highways and Ski Hill Road and shall use earth tone colors and/or screening to minimize their visual impact.

Screening: Landscaping shall be used to screen the view of any resource extraction sites, outdoor storage areas, outdoor trash collection areas, satellite dishes over two (2) meters in diameter, and areas with inoperable equipment or more than four (4) inoperable cars or trucks. Required landscaping should be high altitude, native plant material, trees and shrubs.

Revegetation: The applicant shall revegetate all areas disturbed by grading or cut-and-fill activity with plants similar to those on the remainder of the development site as each stage of grading is completed, and no later than one (1) year after construction.

Utilities: All service utilities (including but not limited to electric and telecommunication lines) shall be placed underground.
