RE: Engineering Review
Butler Farm Subdivision Preliminary Plat
Section 17, T5N, R46E B.M.

Upon review of the Butler Farm Subdivision Preliminary Plat, I have the following observations:

- Subdivision access location needs to be approved through a County Access Permit from Road & Bridge.
- Utilities must be provided to all lots. Utility work should be shown on Construction Documents and referenced in the Development Agreement.

Sincerely:

Darryl Johnson, P.E., P.L.S.
Public Works Director
